AgroFarm-IsfahanVET 2018

16th International exhibition for livestock, poultry and dairy

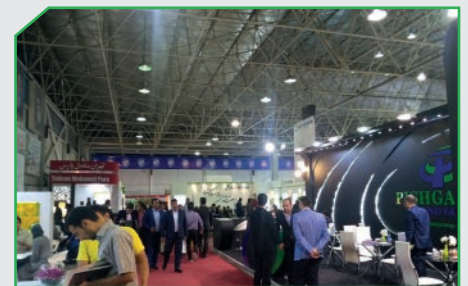

January 31 - February 3
Isfahan, Iran

The Market

Iran with a population of almost 80 million people and a GDP of 404 billion USD (estimated in 2016) is becoming one of the most interesting market-places for the agricultural industry of Europe. During the last decades Iran faced a considerable backlog in foreign investment and the import of modern technology. However, thanks to the recently reached nuclear deal and the lifting of sanctions, it is expected that international trade with Iran will boost enormously. The Ministry of Agriculture Jihad has announced measures to support agricultural industry through subsidies for the purchase of agricultural and farming machinery and equipment as well as investments in meat and milk processing technologies.

The poultry farm industry has gained considerable growth in the last decade and is currently one of the principal meat production sectors of Iran. With nearly 2.3 million tons of output a year, it is the largest in the Middle East, ranked 8th in Asia and 18th in the world. Likewise, the livestock industry plays a key role for the rural population providing about 80 percent of their cash income. On average, 31.8 percent of the gross value of agricultural production is attributed to livestock production. Sheep, goat and cattle are the primary breeds of livestock in Iran.

The Exhibition

DLG International organizes more than 30 specialized trade fairs worldwide focused on the topics of leading DLG events such as EuroTier or AGRITECHNICA in Hanover. Just in time for the opening of the Iranian market, DLG initiates cooperation with Iranian partners on the international exhibition for livestock, poultry and dairy AgroFarm-IsfahanVET. The exhibition will take place from January 31 to February 3, 2018 for the sixteenth time in Isfahan, the capital city of Isfahan Province. In 2017, as many as 142 exhibitors presented their latest technology in animal husbandry to over 10,000 visitors from all over Iran and the foreign countries.

Main Topics

Animal housing • Cattle and poultry breeding • Feed production and storage
• Feed additives and ingredients • Veterinary medicine • Manure handling and treatment • Milk and meat processing • Storage and cooling • Others

Our experience is your profit!

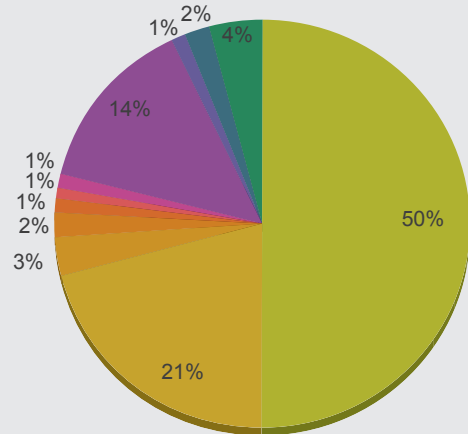

AgroFarm-IsfahanVET 2018

16th International exhibition for livestock, poultry and dairy

January 31 - February 3
Isfahan, Iran

Visitors 2016

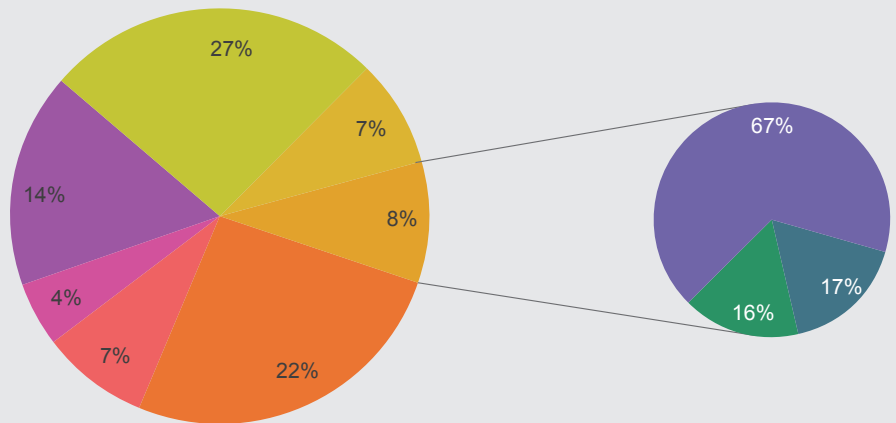

- Dairy Farmers
- Poultry Farmers
- Veterinary Pharmaceutical
- Feed Industry
- Poultry and Livestock Breeding Equipment
- Genetics and Breeding
- Veterinary Labs and Clinics
- Universities, Higher-Education Institution
- Beekeepers and Honey Producers
- Dealers
- Other

Number of visitors: 10,500

Exhibitors 2016

- Animal Husbandry Equipment
- Breeding and Genetics
- Union & Media
- Livestock Importer
- Broiler chicken
- Feed Industry
- Poultry Equipment
- Poultry & Husbandry Equipment
- Pharmaceutical

Number of exhibitors: 142 +23%

DLG Conference 2016

DAY 1

Actual challenges in Poultry Health

Professor Dr. Michael Hess,
University of Veterinary Medicine Vienna, Austria

Poultry Red mite, A big challenge in modern poultry today

Farhad Mozafar,
Technical Service Coordinator, Lohmann Tierzucht, Iran

The essential first week-practical experience with broiler fattening in Germany

Stefan Teepker,
Broiler Farmer, Germany

Modern layer and new looks in feeding

Dr. Zahed Abbasi,
Production Manager, Toyoor Barekat Co., Iran

DAY 2

Milk production in North Western Europe and the world: analysis of Profitability, status and prospects

Dieter Mirbach,
DLG e.V.

Claw health and functional hoof trimming in Dairy Herds

Dr. med. vet. Hans Peter Klindworth, Germany
Veterinary Specialist in Cattle

Modern Dairy cattle breeds - fit for milk production worldwide

Hajo Gehlenborg,
Export Manager - German Genetics International
